

## Overview

Many large-scale projects face exceptional challenges and coordination of local and cross-border issues—including structuring and financing concerns, government regulations, engineering, procurement and construction (EPC) and other contractual issues—is particularly daunting.

Our Project Finance practice provides you with comprehensive legal solutions covering all issues, from the structuring and inception of a project through commercial operation.

Rely on our extensive experience serving several industry sectors, including oil and gas, petrochemicals, power, telecommunications and technology, mining, airports, utilities, water, rail, paper and housing.

Benefit from capabilities that include advising and assisting in the procurement of financing and refinancing, as well as drafting and negotiation of financing, security and project documents, the management of performance risks and the use of credit enhancements to improve structural credit or to shift counterparty risks.

Key service areas:

- Compliance and regulatory advice
- Plant construction
- Public Private Partnerships (PPP)
- Public procurement
