

Overview

Rely on a Capital Markets team that can handle the full spectrum of equity capital market transactions.

From representing sponsors, issuers, underwriters and selling shareholders in Singapore, our team has experience handling domestic and cross-border public offerings of equity securities, including initial public offerings (IPOs), secondary offerings such as placements, rights issues and bonus issues, in addition to spin-off transactions and REITs.

Benefit from our deep experience handling a wide array of IPOs involving Singapore-based issuers, as well as advising those with business interests ranging from China and Taiwan to Indonesia and India. We regularly counsel both investors and companies on private equity investments, venture capital investments and strategic investments, often undertaken as a precursor to IPOs, and have helped numerous clients with post-listing regulatory compliance issues and corporate governance.

Our partners have also assisted arrangers, dealers and issuers on convertible, exchangeable and asset backed debt (including repackaged) securities, standalone debt issues, on the establishment of, and drawdowns under, medium term note (including asset backed structures) programs and certificate of deposit programs, on retail and non-retail structured products and on bank capital regulatory instruments.

Our expertise includes :

- Corporate governance advisory
- Initial Public Offerings (including REITs)
- Pre-IPO investment advisory
- Post-listing compliance advisory
- Secondary Offerings including placements, rights issues, bonus issues
- Debt capital and structured product offerings

Trust our Capital Markets team in Singapore and utilize the full reach of our global capabilities, wherever your business takes you.
